TECHNICAL PROJECTS

Team Velo — Automated Document Review | TypeScript, Python | September 2026

Aggies Invent, Texas A&M, in partnership with Pantex | 3rd place; \$1,500 team prize

- Developed React/Next.js review features for a team prototype that helps reviewers assess DOE policy changes and proposed document updates, with approval, rejection, and revision controls.
- Implemented a rewrite API with input validation and structured-response checks; added automated tests for review-state transitions, invalid responses, and document comparison.
- Built word-level document comparison using sequence-matching algorithms and a Web Worker, with page-linked results; collaborated through GitHub branches, pull requests, and merges.

Speller — Dictionary & Spell Checker | C

- Implemented dictionary loading and case-insensitive lookup using a hash table with linked lists; managed dynamic memory allocation and cleanup.

DNA Profiler | Python

- Loaded CSV profiles and DNA sequence files, used supplied repeat-counting logic, and matched short tandem repeat counts against records to identify a person or report no match.

EXPERIENCE
